

## Process Engineer - Gas Clean Up

**Share the Vision, Share the Wealth**

*Linc Energy is the Australian pioneer in clean coal technology leading the charge to develop alternative energy sources. We are currently in the final stages of commissioning a demonstration Gas-to-Liquids plant converting syngas produced by Underground Coal Gasification into clean fuels. To complete this leading national project Linc Energy is in the middle of an aggressive recruitment campaign.*

*We encourage our team to prosper through having a direct impact on not only the success of the business, but their own personal wealth generation. To do this we offer our employees an extraordinary opportunity to become a shareholder in the business through our employee share option scheme.*

### **Want to be part of the journey?**

To assist us with our growth we require a **Process Engineer, Gas Clean Up**. The successful individual will be working with the third party design engineering team providing technical, process and waste removal concepts.

The role will encompass involvement with internal and external engineering resources in:

- \* Analysis of waste projects
- \* Process development
- \* Test gasification work - analysis and interpretation of data
- \* Gasification technologies
- \* Integrated gasification combined cycle concept studies
- \* Monitoring, optimisation, interpretation of results

The roles require a minimum of 3-7 years of commercial process, full lifecycle, engineering experience, from concept to detail. Project management and commissioning experience will enhance your candidacy. A tertiary education in Chemical or Mechanical Engineering is required.

You will be rewarded with excellent remuneration including sharing in the financial success of the business with share options, salary packaging options as well as an exceptional career opportunity. The position is based in Brisbane with regular travel to site at Chinchilla and occasional interstate or overseas travel.
